Important safety instructions

1. Please read the instructions carefully. Keep it in a safe place for future reference.
2. Do not place the product near any heat source.
3. Avoid the product exposure to dripping and splashing liquids and do not place any containers on the product.
4. Do not block the vents and ensure there is sufficient space around the product for ventilation.
5. To reduce the risk of fire and electric shock, do not expose the product to rain or moisture.
6. Do not place the product in an enclosed environment such as a bookshelf or a cabinet.
7. Do not place the product near strong magnetic fields or electromagnetic interference sources, such as speakers, or subwoofers.
8. Do not place any open flame such as candles on the product. Do not place any heat sources such as electric heaters near the product.
9. Do not place the product on unstable surfaces. Do not touch any objects that are attached to the product.
10. Do not use any unstable stands. Do not touch any objects that are attached to the product or place any heavy objects on the product.
11. Do not place the product where it could be exposed to direct sunlight for long periods of time.
12. Do not place the product where it could be exposed to dust or other particles.
13. Do not place the product where it could be exposed to vibrations.
14. Do not place any other electronic devices on the product.
15. Do not place any other electronic devices that produce strong magnetic fields near the product.
16. Do not place the product where it could be exposed to extreme temperatures.
17. Do not place the product where it could be exposed to high humidity.
18. Do not place the product where it could be exposed to corrosive substances.
19. Do not place the product where it could be exposed to explosive substances.
20. Do not place the product where it could be exposed to flammable substances.
21. Do not place the product where it could be exposed to strong electromagnetic fields.
22. Do not place the product where it could be exposed to strong electrostatic fields.
23. Do not place the product where it could be exposed to strong radiation.
24. Do not place the product where it could be exposed to strong ultraviolet light.
25. Do not place the product where it could be exposed to strong infrared light.
26. Do not place the product where it could be exposed to strong ultrasonic waves.
27. Do not place the product where it could be exposed to strong sound waves.
28. Do not place the product where it could be exposed to strong vibrations.
29. Do not place the product where it could be exposed to strong electromagnetic waves.
30. Do not place the product where it could be exposed to strong electromagnetic fields.
31. Do not place the product where it could be exposed to strong electrostatic fields.
32. Do not place the product where it could be exposed to strong radiation.
33. Do not place the product where it could be exposed to strong ultraviolet light.
34. Do not place the product where it could be exposed to strong infrared light.
35. Do not place the product where it could be exposed to strong ultrasonic waves.
36. Do not place the product where it could be exposed to strong sound waves.
37. Do not place the product where it could be exposed to strong vibrations.
38. Do not place the product where it could be exposed to strong electromagnetic waves.
39. Do not place the product where it could be exposed to strong electromagnetic fields.
40. Do not place the product where it could be exposed to strong electrostatic fields.
41. Do not place the product where it could be exposed to strong radiation.
42. Do not place the product where it could be exposed to strong ultraviolet light.
43. Do not place the product where it could be exposed to strong infrared light.
44. Do not place the product where it could be exposed to strong ultrasonic waves.
45. Do not place the product where it could be exposed to strong sound waves.
46. Do not place the product where it could be exposed to strong vibrations.
47. Do not place the product where it could be exposed to strong electromagnetic waves.
48. Do not place the product where it could be exposed to strong electromagnetic fields.
49. Do not place the product where it could be exposed to strong electrostatic fields.
50. Do not place the product where it could be exposed to strong radiation.
51. Do not place the product where it could be exposed to strong ultraviolet light.
52. Do not place the product where it could be exposed to strong infrared light.
53. Do not place the product where it could be exposed to strong ultrasonic waves.
54. Do not place the product where it could be exposed to strong sound waves.
55. Do not place the product where it could be exposed to strong vibrations.
56. Do not place the product where it could be exposed to strong electromagnetic waves.
57. Do not place the product where it could be exposed to strong electromagnetic fields.
58. Do not place the product where it could be exposed to strong electrostatic fields.
59. Do not place the product where it could be exposed to strong radiation.
60. Do not place the product where it could be exposed to strong ultraviolet light.
61. Do not place the product where it could be exposed to strong infrared light.
62. Do not place the product where it could be exposed to strong ultrasonic waves.
63. Do not place the product where it could be exposed to strong sound waves.
64. Do not place the product where it could be exposed to strong vibrations.
65. Do not place the product where it could be exposed to strong electromagnetic waves.
66. Do not place the product where it could be exposed to strong electromagnetic fields.
67. Do not place the product where it could be exposed to strong electrostatic fields.
68. Do not place the product where it could be exposed to strong radiation.
69. Do not place the product where it could be exposed to strong ultraviolet light.
70. Do not place the product where it could be exposed to strong infrared light.
71. Do not place the product where it could be exposed to strong ultrasonic waves.
72. Do not place the product where it could be exposed to strong sound waves.
73. Do not place the product where it could be exposed to strong vibrations.
74. Do not place the product where it could be exposed to strong electromagnetic waves.
75. Do not place the product where it could be exposed to strong electromagnetic fields.
76. Do not place the product where it could be exposed to strong electrostatic fields.
77. Do not place the product where it could be exposed to strong radiation.
78. Do not place the product where it could be exposed to strong ultraviolet light.
79. Do not place the product where it could be exposed to strong infrared light.
80. Do not place the product where it could be exposed to strong ultrasonic waves.
81. Do not place the product where it could be exposed to strong sound waves.
82. Do not place the product where it could be exposed to strong vibrations.
83. Do not place the product where it could be exposed to strong electromagnetic waves.
84. Do not place the product where it could be exposed to strong electromagnetic fields.
85. Do not place the product where it could be exposed to strong electrostatic fields.
86. Do not place the product where it could be exposed to strong radiation.
87. Do not place the product where it could be exposed to strong ultraviolet light.
88. Do not place the product where it could be exposed to strong infrared light.
89. Do not place the product where it could be exposed to strong ultrasonic waves.
90. Do not place the product where it could be exposed to strong sound waves.
91. Do not place the product where it could be exposed to strong vibrations.
92. Do not place the product where it could be exposed to strong electromagnetic waves.
93. Do not place the product where it could be exposed to strong electromagnetic fields.
94. Do not place the product where it could be exposed to strong electrostatic fields.
95. Do not place the product where it could be exposed to strong radiation.
96. Do not place the product where it could be exposed to strong ultraviolet light.
97. Do not place the product where it could be exposed to strong infrared light.
98. Do not place the product where it could be exposed to strong ultrasonic waves.
99. Do not place the product where it could be exposed to strong sound waves.
100. Do not place the product where it could be exposed to strong vibrations.
101. Do not place the product where it could be exposed to strong electromagnetic waves.
102. Do not place the product where it could be exposed to strong electromagnetic fields.
103. Do not place the product where it could be exposed to strong electrostatic fields.
104. Do not place the product where it could be exposed to strong radiation.
105. Do not place the product where it could be exposed to strong ultraviolet light.
106. Do not place the product where it could be exposed to strong infrared light.
107. Do not place the product where it could be exposed to strong ultrasonic waves.
108. Do not place the product where it could be exposed to strong sound waves.
109. Do not place the product where it could be exposed to strong vibrations.
110. Do not place the product where it could be exposed to strong electromagnetic waves.
111. Do not place the product where it could be exposed to strong electromagnetic fields.
112. Do not place the product where it could be exposed to strong electrostatic fields.
113. Do not place the product where it could be exposed to strong radiation.
114. Do not place the product where it could be exposed to strong ultraviolet light.
115. Do not place the product where it could be exposed to strong infrared light.
116. Do not place the product where it could be exposed to strong ultrasonic waves.
117. Do not place the product where it could be exposed to strong sound waves.
118. Do not place the product where it could be exposed to strong vibrations.
119. Do not place the product where it could be exposed to strong electromagnetic waves.
120. Do not place the product where it could be exposed to strong electromagnetic fields.
121. Do not place the product where it could be exposed to strong electrostatic fields.
122. Do not place the product where it could be exposed to strong radiation.
123. Do not place the product where it could be exposed to strong ultraviolet light.
124. Do not place the product where it could be exposed to strong infrared light.
125. Do not place the product where it could be exposed to strong ultrasonic waves.
126. Do not place the product where it could be exposed to strong sound waves.
127. Do not place the product where it could be exposed to strong vibrations.
128. Do not place the product where it could be exposed to strong electromagnetic waves.
129. Do not place the product where it could be exposed to strong electromagnetic fields.
130. Do not place the product where it could be exposed to strong electrostatic fields.
131. Do not place the product where it could be exposed to strong radiation.
132. Do not place the product where it could be exposed to strong ultraviolet light.
133. Do not place the product where it could be exposed to strong infrared light.
134. Do not place the product where it could be exposed to strong ultrasonic waves.
135. Do not place the product where it could be exposed to strong sound waves.
136. Do not place the product where it could be exposed to strong vibrations.
137. Do not place the product where it could be exposed to strong electromagnetic waves.
138. Do not place the product where it could be exposed to strong electromagnetic fields.
139. Do not place the product where it could be exposed to strong electrostatic fields.
140. Do not place the product where it could be exposed to strong radiation.
141. Do not place the product where it could be exposed to strong ultraviolet light.
142. Do not place the product where it could be exposed to strong infrared light.
143. Do not place the product where it could be exposed to strong ultrasonic waves.
144. Do not place the product where it could be exposed to strong sound waves.
145. Do not place the product where it could be exposed to strong vibrations.
146. Do not place the product where it could be exposed to strong electromagnetic waves.
147. Do not place the product where it could be exposed to strong electromagnetic fields.
148. Do not place the product where it could be exposed to strong electrostatic fields.
149. Do not place the product where it could be exposed to strong radiation.
150. Do not place the product where it could be exposed to strong ultraviolet light.
151. Do not place the product where it could be exposed to strong infrared light.
152. Do not place the product where it could be exposed to strong ultrasonic waves.
153. Do not place the product where it could be exposed to strong sound waves.
154. Do not place the product where it could be exposed to strong vibrations.
155. Do not place the product where it could be exposed to strong electromagnetic waves.
156. Do not place the product where it could be exposed to strong electromagnetic fields.
157. Do not place the product where it could be exposed to strong electrostatic fields.
158. Do not place the product where it could be exposed to strong radiation.
159. Do not place the product where it could be exposed to strong ultraviolet light.
160. Do not place the product where it could be exposed to strong infrared light.
161. Do not place the product where it could be exposed to strong ultrasonic waves.
162. Do not place the product where it could be exposed to strong sound waves.
163. Do not place the product where it could be exposed to strong vibrations.
164. Do not place the product where it could be exposed to strong electromagnetic waves.
165. Do not place the product where it could be exposed to strong electromagnetic fields.
166. Do not place the product where it could be exposed to strong electrostatic fields.
167. Do not place the product where it could be exposed to strong radiation.
168. Do not place the product where it could be exposed to strong ultraviolet light.
169. Do not place the product where it could be exposed to strong infrared light.
170. Do not place the product where it could be exposed to strong ultrasonic waves.
171. Do not place the product where it could be exposed to strong sound waves.
172. Do not place the product where it could be exposed to strong vibrations.
173. Do not place the product where it could be exposed to strong electromagnetic waves.
174. Do not place the product where it could be exposed to strong electromagnetic fields.
175. Do not place the product where it could be exposed to strong electrostatic fields.
176. Do not place the product where it could be exposed to strong radiation.
177. Do not place the product where it could be exposed to strong ultraviolet light.
178. Do not place the product where it could be exposed to strong infrared light.
179. Do not place the product where it could be exposed to strong ultrasonic waves.
180. Do not place the product where it could be exposed to strong sound waves.
181. Do not place the product where it could be exposed to strong vibrations.
182. Do not place the product where it could be exposed to strong electromagnetic waves.
183. Do not place the product where it could be exposed to strong electromagnetic fields.
184. Do not place the product where it could be exposed to strong electrostatic fields.
185. Do not place the product where it could be exposed to strong radiation.
186. Do not place the product where it could be exposed to strong ultraviolet light.
187. Do not place the product where it could be exposed to strong infrared light.
188. Do not place the product where it could be exposed to strong ultrasonic waves.
189. Do not place the product where it could be exposed to strong sound waves.
190. Do not place the product where it could be exposed to strong vibrations.
191. Do not place the product where it could be exposed to strong electromagnetic waves.
192. Do not place the product where it could be exposed to strong electromagnetic fields.
193. Do not place the product where it could be exposed to strong electrostatic fields.
194. Do not place the product where it could be exposed to strong radiation.
195. Do not place the product where it could be exposed to strong ultraviolet light.
196. Do not place the product where it could be exposed to strong infrared light.
197. Do not place the product where it could be exposed to strong ultrasonic waves.
198. Do not place the product where it could be exposed to strong sound waves.
199. Do not place the product where it could be exposed to strong vibrations.
200. Do not place the product where it could be exposed to strong electromagnetic waves.
201. Do not place the product where it could be exposed to strong electromagnetic fields.
202. Do not place the product where it could be exposed to strong electrostatic fields.
203. Do not place the product where it could be exposed to strong radiation.
204. Do not place the product where it could be exposed to strong ultraviolet light.
205. Do not place the product where it could be exposed to strong infrared light.
206. Do not place the product where it could be exposed to strong ultrasonic waves.
207. Do not place the product where it could be exposed to strong sound waves.
208. Do not place the product where it could be exposed to strong vibrations.
209. Do not place the product where it could be exposed to strong electromagnetic waves.
210. Do not place the product where it could be exposed to strong electromagnetic fields.
211. Do not place the product where it could be exposed to strong electrostatic fields.
212. Do not place the product where it could be exposed to strong radiation.
213. Do not place the product where it could be exposed to strong ultraviolet light.
214. Do not place the product where it could be exposed to strong infrared light.
215. Do not place the product where it could be exposed to strong ultrasonic waves.
216. Do not place the product where it could be exposed to strong sound waves.
217. Do not place the product where it could be exposed to strong vibrations.
218. Do not place the product where it could be exposed to strong electromagnetic waves.
219. Do not place the product where it could be exposed to strong electromagnetic fields.
220. Do not place the product where it could be exposed to strong electrostatic fields.
221. Do not place the product where it could be exposed to strong radiation.
222. Do not place the product where it could be exposed to strong ultraviolet light.
223. Do not place the product where it could be exposed to strong infrared light.
224. Do not place the product where it could be exposed to strong ultrasonic waves.
225. Do not place the product where it could be exposed to strong sound waves.
226. Do not place the product where it could be exposed to strong vibrations.
227. Do not place the product where it could be exposed to strong electromagnetic waves.
228. Do not place the product where it could be exposed to strong electromagnetic fields.
229. Do not place the product where it could be exposed to strong electrostatic fields.
230. Do not place the product where it could be exposed to strong radiation.
231. Do not place the product where it could be exposed to strong ultraviolet light.
232. Do not place the product where it could be exposed to strong infrared light.
233. Do not place the product where it could be exposed to strong ultrasonic waves.
234. Do not place the product where it could be exposed to strong sound waves.
235. Do not place the product where it could be exposed to strong vibrations.
236. Do not place the product where it could be exposed to strong electromagnetic waves.
237. Do not place the product where it could be exposed to strong electromagnetic fields.
238. Do not place the product where it could be exposed to strong electrostatic fields.
239. Do not place the product where it could be exposed to strong radiation.
240. Do not place the product where it could be exposed to strong ultraviolet light.
241. Do not place the product where it could be exposed to strong infrared light.
242. Do not place the product where it could be exposed to strong ultrasonic waves.
243. Do not place the product where it could be exposed to strong sound waves.
244. Do not place the product where it could be exposed to strong vibrations.
245. Do not place the product where it could be exposed to strong electromagnetic waves.
246. Do not place the product where it could be exposed to strong electromagnetic fields.
247. Do not place the product where it could be exposed to strong electrostatic fields.
248. Do not place the product where it could be exposed to strong radiation.
249. Do not place the product where it could be exposed to strong ultraviolet light.
250. Do not place the product where it could be exposed to strong infrared light.
251. Do not place the product where it could be exposed to strong ultrasonic waves.
252. Do not place the product where it could be exposed to strong sound waves.
253. Do not place the product where it could be exposed to strong vibrations.
254. Do not place the product where it could be exposed to strong electromagnetic waves.
255. Do not place the product where it could be exposed to strong electromagnetic fields.
256. Do not place the product where it could be exposed to strong electrostatic fields.
257. Do not place the product where it could be exposed to strong radiation.
258. Do not place the product where it could be exposed to strong ultraviolet light.
259. Do not place the product where it could be exposed to strong infrared light.
260. Do not place the product where it could be exposed to strong ultrasonic waves.
261. Do not place the product where it could be exposed to strong sound waves.
262. Do not place the product where it could be exposed to strong vibrations.
263. Do not place the product where it could be exposed to strong electromagnetic waves.
264. Do not place the product where it could be exposed to strong electromagnetic fields.
265. Do not place the product where it could be exposed to strong electrostatic fields.
266. Do not place the product where it could be exposed to strong radiation.
267. Do not place the product where it could be exposed to strong ultraviolet light.
268. Do not place the product where it could be exposed to strong infrared light.
269. Do not place the product where it could be exposed to strong ultrasonic waves.
270. Do not place the product where it could be exposed to strong sound waves.
271. Do not place the product where it could be exposed to strong vibrations.
272. Do not place the product where it could be exposed to strong electromagnetic waves.
273. Do not place the product where it could be exposed to strong electromagnetic fields.
274. Do not place the product where it could be exposed to strong electrostatic fields.
275. Do not place the product where it could be exposed to strong radiation.
276. Do not place the product where it could be exposed to strong ultraviolet light.
277. Do not place the product where it could be exposed to strong infrared light.
278. Do not place the product where it could be exposed to strong ultrasonic waves.
279. Do not place the product where it could be exposed to strong sound waves.
280. Do not place the product where it could be exposed to strong vibrations.
281. Do not place the product where it could be exposed to strong electromagnetic waves.
282. Do not place the product where it could be exposed to strong electromagnetic fields.
283. Do not place the product where it could be exposed to strong electrostatic fields.
284. Do not place the product where it could be exposed to strong radiation.
285. Do not place the product where it could be exposed to strong ultraviolet light.
286. Do not place the product where it could be exposed to strong infrared light.
287. Do not place the product where it could be exposed to strong ultrasonic waves.
288. Do not place the product where it could be exposed to strong sound waves.
289. Do not place the product where it could be exposed to strong vibrations.
290. Do not place the product where it could be exposed to strong electromagnetic waves.
291. Do not place the product where it could be exposed to strong electromagnetic fields.
292. Do not place the product where it could be exposed to strong electrostatic fields.
293. Do not place the product where it could be exposed to strong radiation.
294. Do not place the product where it could be exposed to strong ultraviolet light.
295. Do not place the product where it could be exposed to strong infrared light.
296. Do not place the product where it could be exposed to strong ultrasonic waves.
297. Do not place the product where it could be exposed to strong sound waves.
298. Do not place the product where it could be exposed to strong vibrations.
299. Do not place the product where it could be exposed to strong electromagnetic waves.
300. Do not place the product where it could be exposed to strong electromagnetic fields.
301. Do not place the product where it could be exposed to strong electrostatic fields.
302. Do not place the product where it could be exposed to strong radiation.
303. Do not place the product where it could be exposed to strong ultraviolet light.
304. Do not place the product where it could be exposed to strong infrared light.
305. Do not place the product where it could be exposed to strong ultrasonic waves.
306. Do not place the product where it could be exposed to strong sound waves.
307. Do not place the product where it could be exposed to strong vibrations.
308. Do not place the product where it could be exposed to strong electromagnetic waves.
309. Do not place the product where it could be exposed to strong electromagnetic fields.
310. Do not place the product where it could be exposed to strong electrostatic fields.
311. Do not place the product where it could be exposed to strong radiation.
312. Do not place the product where it could be exposed to strong ultraviolet light.
313. Do not place the product where it could be exposed to strong infrared light.
314. Do not place the product where it could be exposed to strong ultrasonic waves.
315. Do not place the product where it could be exposed to strong sound waves.
316. Do not place the product where it could be exposed to strong vibrations.
317. Do not place the product where it could be exposed to strong electromagnetic waves.
318. Do not place the product where it could be exposed to strong electromagnetic fields.
319. Do not place the product where it could be exposed to strong electrostatic fields.
320. Do not place the product where it could be exposed to strong radiation.
321. Do not place the product where it could be exposed to strong ultraviolet light.
322. Do not place the product where it could be exposed to strong infrared light.
323. Do not place the product where it could be exposed to strong ultrasonic waves.
324. Do not place the product where it could be exposed to strong sound waves.
325. Do not place the product where it could be exposed to strong vibrations.
326. Do not place the product where it could be exposed to strong electromagnetic waves.
327. Do not place the product where it could be exposed to strong electromagnetic fields.
328. Do not place the product where it could be exposed to strong electrostatic fields.
329. Do not place the product where it could be exposed to strong radiation.
330. Do not place the product where it could be exposed to strong ultraviolet light.
331. Do not place the product where it could be exposed to strong infrared light.
332. Do not place the product where it could be exposed to strong ultrasonic waves.
333. Do not place the product where it could be exposed to strong sound waves.
334. Do not place the product where it could be exposed to strong vibrations.
335. Do not place the product where it could be exposed to strong electromagnetic waves.
336. Do not place the product where it could be exposed to strong electromagnetic fields.
337. Do not place the product where it could be exposed to strong electrostatic fields.
338. Do not place the product where it could be exposed to strong radiation.
339. Do not place the product where it could be exposed to strong ultraviolet light.
340. Do not place the product where it could be exposed to strong infrared light.
341. Do not place the product where it could be exposed to strong ultrasonic waves.
342. Do not place the product where it could be exposed to strong sound waves.
343. Do not place the product where it could be exposed to strong vibrations.
344. Do not place the product where it could be exposed to strong electromagnetic waves.
345. Do not place the product where it could be exposed to strong electromagnetic fields.
346. Do not place the product where it could be exposed to strong electrostatic fields.
347. Do not place the product where it could be exposed to strong radiation.
348. Do not place the product where it could be exposed to strong ultraviolet light.
349. Do not place the product where it could be exposed to strong infrared light.
350. Do not place the product where it could be exposed to strong ultrasonic waves.
351. Do not place the product where it could be exposed to strong sound waves.
352. Do not place the product where it could be exposed to strong vibrations.
353. Do not place the product where it could be exposed to strong electromagnetic waves.
354. Do not place the product where it could be exposed to strong electromagnetic fields.
355. Do not place the product where it could be exposed to strong electrostatic fields.
356. Do not place the product where it could be exposed to strong radiation.
357. Do not place the product where it could be exposed to strong ultraviolet light.
358. Do not place the product where it could be exposed to strong infrared light.
359. Do not place the product where it could be exposed to strong ultrasonic waves.
360. Do not place the product where it could be exposed to strong sound waves.
361. Do not place the product where it could be exposed to strong vibrations.
362. Do not place the product where it could be exposed to strong electromagnetic waves.
363. Do not place the product where it could be exposed to strong electromagnetic fields.
364. Do not place the product where it could be exposed to strong electrostatic fields.
365. Do not place the product where it could be exposed to strong radiation.
366. Do not place the product where it could be exposed to strong ultraviolet light.
367. Do not place the product where it could be exposed to strong infrared light.
368. Do not place the product where it could be exposed to strong ultrasonic waves.
369. Do not place the product where it could be exposed to strong sound waves.
370. Do not place the product where it could be exposed to strong vibrations.
371. Do not place the product where it could be exposed to strong electromagnetic waves.
372. Do not place the product where it could be exposed to strong electromagnetic fields.
373. Do not place the product where it could be exposed to strong electrostatic fields.
374. Do not place the product where it could be exposed to strong radiation.
375. Do not place the product where it could be exposed to strong ultraviolet light.
376. Do not place the product where it could be exposed to strong infrared light.
377. Do not place the product where it could be exposed to strong ultrasonic waves.
378. Do not place the product where it could be exposed to strong sound waves.
379. Do not place the product where it could be exposed to strong vibrations.
380. Do not place the product where it could be exposed to strong electromagnetic waves.
381. Do not place the product where it could be exposed to strong electromagnetic fields.
382. Do not place the product where it could be exposed to strong electrostatic fields.
383. Do not place the product where it could be exposed to strong radiation.
384. Do not place the product where it could be exposed to strong ultraviolet light.
385. Do not place the product where it could be exposed to strong infrared light.
386. Do not place the product where it could be exposed to strong ultrasonic waves.
387. Do not place the product where it could be exposed to strong sound waves.
388. Do not place the product where it could be exposed to strong vibrations.
389. Do not place the product where it could be exposed to strong electromagnetic waves.
390. Do not place the product where it could be exposed to strong electromagnetic fields.
391. Do not place the product where it could be exposed to strong electrostatic fields.
392. Do not place the product where it could be exposed to strong radiation.
393. Do not place the product where it could be exposed to strong ultraviolet light.
394. Do not place the product where it could be exposed to strong infrared light.
395. Do not place the product where it could be exposed to strong ultrasonic waves.
396. Do not place the product where it could be exposed to strong sound waves.
397. Do not place the product where it could be exposed to strong vibrations.
398. Do not place the product where it could be exposed to strong electromagnetic waves.
399. Do not place the product where it could be exposed to strong electromagnetic fields.
400. Do not place the product where it could be exposed to strong electrostatic fields.
401. Do not place the product where it could be exposed to strong radiation.
402. Do not place the product where it could be exposed to strong ultraviolet light.
403. Do not place the product where it could be exposed to strong infrared light.
404. Do not place the product where it could be exposed to strong ultrasonic waves.
405. Do not place the product where it could be exposed to strong sound waves.
406. Do not place the product where it could be exposed to strong vibrations.
407. Do not place the product where it could be exposed to strong electromagnetic waves.
408. Do not place the product where it could be exposed to strong electromagnetic fields.
409. Do not place the product where it could be exposed to strong electrostatic fields.
410. Do not place the product where it could be exposed to strong radiation.
411. Do not place the product where it could be exposed to strong ultraviolet light.
412. Do not place the product where it could be exposed to strong infrared light.
413. Do not place the product where it could be exposed to strong ultrasonic waves.
414. Do not place the product where it could be exposed to strong sound waves.
415. Do not place the product where it could be exposed to strong vibrations.
416. Do not place the product where it could be exposed to strong electromagnetic waves.
417. Do not place the product where it could be exposed to strong electromagnetic fields.
418. Do not place the product where it could be exposed to strong electrostatic fields.
419. Do not place the product where it could be exposed to strong radiation.
420. Do not place the product where it could be exposed to strong ultraviolet light.
421. Do not place the product where it could be exposed to strong infrared light.
422. Do not place the product where it could be exposed to strong ultrasonic waves.
423. Do not place the product where it could be exposed to strong sound waves.
424. Do not place the product where it could be exposed to strong vibrations.
425. Do not place the product where it could be exposed to strong electromagnetic waves.
426. Do not place the product where it could be exposed to strong electromagnetic fields.
427. Do not place the product where it could be exposed to strong electrostatic fields.
428. Do not place the product where it could be exposed to strong radiation.
429. Do not place the product where it could be exposed to strong ultraviolet light.
430. Do not place the product where it could be exposed to strong infrared light.
431. Do not place the product where it could be exposed to strong ultrasonic waves.
432. Do not place the product where it could be exposed to strong sound waves.
433. Do not place the product where it could be exposed to strong vibrations.
434. Do not place the product where it could be exposed to strong electromagnetic waves.
435. Do not place the product where it could be exposed to strong electromagnetic fields.
436. Do not place the product where it could be exposed to strong electrostatic fields.
437. Do not place the product where it could be exposed to strong radiation.
438. Do not place the product where it could be exposed to strong ultraviolet light.
439. Do not place the product where it could be exposed to strong infrared light.
440. Do not place the product where it could be exposed to strong ultrasonic waves.
441. Do not place the product where it could be exposed to strong sound waves.
442. Do not place the product where it could be exposed to strong vibrations.
443. Do not place the product where it could be exposed to strong electromagnetic waves.
444. Do not place the product where it could be exposed to strong electromagnetic fields.
445. Do not place the product where it could be exposed to strong electrostatic fields.
446. Do not place the product where it could be exposed to strong radiation.
447. Do not place the product where it could be exposed to strong ultraviolet light.
448. Do not place the product where it could be exposed to strong infrared light.
449. Do not place the product where it could be exposed to strong ultrasonic waves.
450. Do not place the product where it could be exposed to strong sound waves.
451. Do not place the product where it could be exposed to strong vibrations.
452. Do not place the product where it could be exposed to strong electromagnetic waves.
453. Do not place the product where it could be exposed to strong electromagnetic fields.
454. Do not place the product where it could be exposed to strong electrostatic fields.
455. Do not place the product where it could be exposed to strong radiation.
456. Do not place the product where it could be exposed to strong ultraviolet light.
457. Do not place the product where it could be exposed to strong infrared light.
458. Do not place the product where it could be exposed to strong ultrasonic waves.
459. Do not place the product where it could be exposed to strong sound waves.
460. Do not place the product where it could be exposed to strong vibrations.
461. Do not place the product where it could be exposed to strong electromagnetic waves.
462. Do not place the product where it could be exposed to strong electromagnetic fields.
463. Do not place the product where it could be exposed to strong electrostatic fields.
464. Do not place the product where it could be exposed to strong radiation.
465. Do not place the product where it could be exposed to strong ultraviolet light.
466. Do not place the product where it could be exposed to strong infrared light.
467. Do not place the product where it could be exposed to strong ultrasonic waves.
468. Do not place the product where it could be exposed to strong sound waves.
469. Do not place the product where it could be exposed to strong vibrations.
470. Do not place the product where it could be exposed to strong electromagnetic waves.
471. Do not place the product where it could be exposed to strong electromagnetic fields.
472. Do not place the product where it could be exposed to strong electrostatic fields.
473. Do not place the product where it could be exposed to strong radiation.
474. Do not place the product where it could be exposed to strong ultraviolet light.
475. Do not place the product where it could be exposed to strong infrared light.
476. Do not place the product where it could be exposed to strong ultrasonic waves.
477. Do not place the product where it could be exposed to strong sound waves.
478. Do not place the product where it could be exposed to strong vibrations.
479. Do not place the product where it could be exposed to strong electromagnetic waves.
480. Do not place the product where it could be exposed to strong electromagnetic fields.
481. Do not place the product where it could be exposed to strong electrostatic fields.
482. Do not place the product where it could be exposed to strong radiation.
483. Do not place the product where it could be exposed to strong ultraviolet light.
484. Do not place the product where it could be exposed to strong infrared light.
485. Do not place the product where it could be exposed to strong ultrasonic waves.
486. Do not place the product where it could be exposed to strong sound waves.
487. Do not place the product where it could be exposed to strong vibrations.
488. Do not place the product where it could be exposed to strong electromagnetic waves.
489. Do not place the product where it could be exposed to strong electromagnetic fields.
490. Do not place the product where it could be exposed to strong electrostatic fields.
491. Do not place the product where it could be exposed to strong radiation.
492. Do not place the product where it could be exposed to strong ultraviolet light.
493. Do not place the product where it could be exposed to strong infrared light.
494. Do not place the product where it could be exposed to strong ultrasonic waves.
495. Do not place the product where it could be exposed to strong sound waves.
496. Do not place the product where it could be exposed to strong vibrations.
497. Do not place the product where it could be exposed to strong electromagnetic waves.
498. Do not place the product where it could be exposed to strong electromagnetic fields.
499. Do not place the product where it could be exposed to strong electrostatic fields.
500. Do not place the product where it could be exposed to strong radiation.
501. Do not place the product where it could be exposed to strong ultraviolet light.
502. Do not place the product where it could be exposed to strong infrared light.
503. Do not place the product where it could be exposed to strong ultrasonic waves.
504. Do not place the product where it could be exposed to strong sound waves.
505. Do not place the product where it could be exposed to strong vibrations.
506. Do not place the product where it could be exposed to strong electromagnetic waves.
507. Do not place the product where it could be exposed to strong electromagnetic fields.
508. Do not place the product where it could be exposed to strong electrostatic fields.
509. Do not place the product where it could be exposed to strong radiation.
510. Do not place the product where it could be exposed to strong ultraviolet light.
511. Do not place the product where it could be exposed to strong infrared light.
512. Do not place the product where it could be exposed to strong ultrasonic waves.
513. Do not place the product where it could be exposed to strong sound waves.
514. Do not place the product where it could be exposed to strong vibrations.
515. Do not place the product where it could be exposed to strong electromagnetic waves.
516. Do not place the product where it could be exposed to strong electromagnetic fields.
517. Do not place the product where it could be exposed to strong electrostatic fields.
518. Do not place the product where it could be exposed to strong radiation.
519. Do not place the product where it could be exposed to strong ultraviolet light.
520. Do not place the product where it could be exposed to strong infrared light.
521. Do not place the product where it could be exposed to strong ultrasonic waves.
522. Do not place the product where it could be exposed to strong sound waves.
523. Do not place the product where it could be exposed to strong vibrations.
524. Do not place the product where it could be exposed to strong electromagnetic waves.
525. Do not place the product where it could be exposed to strong electromagnetic fields.
526. Do not place the product where it could be exposed to strong electrostatic fields.
527. Do not place the product where it could be exposed to strong radiation.
528. Do not place the product where it could be exposed to strong ultraviolet light.
529. Do not place the product where it could be exposed to strong infrared light.
530. Do not place the product where it could be exposed to strong ultrasonic waves.
531. Do not place the product where it could be exposed to strong sound waves.
532. Do not place the product where it could be exposed to strong vibrations.
533. Do not place the product where it could be exposed to strong electromagnetic waves.
534. Do not place the product where it could be exposed to strong electromagnetic fields.
535. Do not place the product where it could be exposed to strong electrostatic fields.
536. Do not place the product where it could be exposed to strong radiation.
537. Do not place the product where it could be exposed to strong ultraviolet light.
538. Do not place the product where it could be exposed to strong infrared light.
539. Do not place the product where it could be exposed to strong ultrasonic waves.
540. Do not place the product where it could be exposed to strong sound waves.
541. Do not place the product where it could be exposed to strong vibrations.
542. Do not place the product where it could be exposed to strong electromagnetic waves.
543. Do not place the product where it could be exposed to strong electromagnetic fields.
544. Do not place the product where it could be exposed to strong electrostatic fields.
545. Do not place the product where it could be exposed to strong radiation.
546. Do not place the product where it could be exposed to strong ultraviolet light.
547. Do not place the product where it could be exposed to strong infrared light.
548. Do not place the product where it could be exposed to strong ultrasonic waves.
549. Do not place the product where it could be exposed to strong sound waves.
550. Do not place the product where it could be exposed to strong vibrations.
551. Do not place the product where it could be exposed to strong electromagnetic waves.
552. Do not place the product where it could be exposed to strong electromagnetic fields.
553. Do not place the product where it could be exposed to strong electrostatic fields.
554. Do not place the product where it could be exposed to strong radiation.
555. Do not place the product where it could be exposed to strong ultraviolet light.
556. Do not place the product where it could be exposed to strong infrared light.
557. Do not place the product where it could be exposed to strong ultrasonic waves.
558. Do not place the product where it could be exposed to strong sound waves.
559. Do not place the product where it could be exposed to strong vibrations.
560. Do not place the product where it could be exposed to strong electromagnetic waves.
561. Do not place the product where it could be exposed to strong electromagnetic fields.
562. Do not place the product where it could be exposed to strong electrostatic fields.
563. Do not place the product where it could be exposed to strong radiation.
564. Do not place the product where it could be exposed to strong ultraviolet light.
565. Do not place the product where it could be exposed to strong infrared light.
566. Do not place the product where it could be exposed to strong ultrasonic waves.
567. Do not place the product where it could be exposed to strong sound waves.
568. Do not place the product where it could be exposed to strong vibrations.
569. Do not place the product where it could be exposed to strong electromagnetic waves.
570. Do not place the product where it could be exposed to strong electromagnetic fields.
571. Do not place the product where it could be exposed to strong electrostatic fields.
572. Do not place the product where it could be exposed to strong radiation.
573. Do not place the product where it could be exposed to strong ultraviolet light.
574. Do not place the product where it could be exposed to strong infrared light.
575. Do not place the product where it could be exposed to strong ultrasonic waves.
576. Do not place the product where it could be exposed to strong sound waves.
577. Do not place the product where it could be exposed to strong vibrations.
578. Do not place the product where it could be exposed to strong electromagnetic waves.
579. Do not place the product where it could be exposed to strong electromagnetic fields.
580. Do not place the product where it could be exposed to strong electrostatic fields.
581. Do not place the product where it could be exposed to strong radiation.
582. Do not place the product where it could be exposed to strong ultraviolet light.
583. Do not place the product where it could be exposed to strong infrared light.
584. Do not place the product where it could be exposed to strong ultrasonic waves.
585. Do not place the product where it could be exposed to strong sound waves.
586. Do not place the product where it could be exposed to strong vibrations.
587. Do not place the product where it could be exposed to strong electromagnetic waves.
588. Do not place the product where it could be exposed to strong electromagnetic fields.
589. Do not place the product where it could be exposed to strong electrostatic fields.
590. Do not place the product where it could be exposed to strong radiation.
591. Do not place the product where it could be exposed to strong ultraviolet light.
592. Do not place the product where it could be exposed to strong infrared light.
593. Do not place the product where it could be exposed to strong ultrasonic waves.
594. Do not place the product where it could be exposed to strong sound waves.
595. Do not place the product where it could be exposed to strong vibrations.
596. Do not place the product where it could be exposed to strong electromagnetic waves.
597. Do not place the product where it could be exposed to strong electromagnetic fields.
598. Do not place the product where it could be exposed
