

Amplifier	Stereo 8.5 V3 ●● 160W@8ohm, 200W@4ohm 		Utilizing the same V3 amplifier modules as our exemplary mono amps and a half-size Ref 9V3SE capacitor board for near-SE level performance, the Stereo 8.5 V3 is the most powerful and compact stereo amplifier on the market.					
	Reference 9 V3 ●● 175W@8ohm, 325W@4ohm 		The NuForce Reference Series mono amplifiers are designed for high-performance stereo and home-theater use. They can be used for bi-amping, tri-amping and home-theater mixing-and-matching with our MCH series multi-channel amplifiers. The Ref 9V3 is NuForce's standard Reference Series mono amp. For explosive bass dynamics, the Ref 9V3SE utilizes a proprietary low-ESR CMA (Cross Matrix Array) capacitor board design featuring high-performance capacitors.					
	Reference 18 ●● 175W@8ohm, 325W@4ohm 		The 17"-wide NuForce Reference Series offers uncompromising quality and design. Allowing for mixing, matching, bi-amping and multi-channel operation, the Ref 18 retains the 8.5"-wide Reference Series' sonic signature refined to its fullest potential.					
	MCH-200C3 (3x160W@8ohm, 3x180W@4ohm) 	MCH-200C5 (5x160W@8ohm, 5x180W@4ohm)	MCH-200C7 (7x160W@8ohm, 7x160W@4ohm)	MCH-200XSEC5 (5x160W@8ohm, 5x180W@4ohm, installer version, no remote, SE capacitor board)	MCH-200XSEC7 (7x160W@8ohm, 7x160W@4ohm, installer version, no remote, SE capacitor board)	MCH-300C7 (7x190W@8ohm, 7x300W@4ohm)	MCH-300SEC7 (7x190W@8ohm, 7x300W@4ohm, SE class)	MCH-300XSEC7 (7x190W@8ohm, 7x300W@4ohm, installer version, no remote, SE capacitor board)
NuForce's MCH Home-Theater Series defines state-of-the-art multi-channel analog switching amplifiers. These low-profile (3.5-inch tall) amplifiers deliver explosive dynamics and superb bass control for surround-sound home theater and two-channel listening. The MCH continues the rich, exquisitely detailed sound that has earned NuForce its enviable reputation among audiophiles and reviewers. The MCH-200 and MCH-300 units offer manual activation of their multi-channel amplifiers by way of front-panel buttons. The MCH-200, available in five- and seven-channel versions, can be upgraded to the MCH 300's higher-power capability.								
DAC & Headphone Amp	DAC-9 192K ●● 		The NuForce DAC-9 stands as a definitive digital-to-analog conversion hub. Its six digital inputs offer compatibility with every existing digital source. When Fixed-Mode Output is selected, the digitally controlled, precision volume attenuator is bypassed via an audiophile grade mechanical relay. It also features a discrete headphone amp with 3.5mm and 6.3mm outputs.					
	IA-18 ●● 200W X 2 		The NuForce IA-18 V3 is an SE-class integrated stereo amplifier with remote control housed in a premium 17-inch wide chassis. Incorporating the same proprietary technology first used in NuForce's flagship Reference Series Ref-18 amplifier and P-20 preamplifier, it delivers crystalline audiophile transparency and a vanishingly low noise-floor while also offering the same refined panache and stylish touch-strip control as that of its reference siblings.					
Preamp	P-9 ●● 		Housed in two chassis, the low-noise, high-performance NuForce P-9 preamplifier is a break-through product with 0.0004% THD+N at 1kHz and a power bandwidth of 5MHz. One chassis contains three power supplies and microprocessor control logic. The second chassis contains an analog volume control, input selection relays, and sensitive analog circuit components. Externally, the dual P-9 chassis are a stylistic match with the NuForce Ref 9 Series power amplifiers.					
	P-20 ●● 		The NuForce P-20 is a world-class preamplifier featuring ultra-high bandwidth (-3dB at 5MHz) and ultra-low distortion (0.0006% THD). Each of the P-20's thoroughly transparent inputs offer independent gain trimming for accurate matching of source levels, while volume and balance can be adjusted over a range of 99 levels in precise, 0.5 dB steps. Pristine circuit design and an advanced, switched-resistor ladder network for volume control deliver vanishingly low noise and distortion levels worthy of the finest systems.					

DAC & Headphone Amp	NuForce DAC-100 ●● 	<p>The NuForce DAC-100 is a class-leading digital-to-analog converter designed for consumers seeking a level of performance typically found in the finest audiophile equipment. The DAC-100's exemplary sound management reveals your headphones' or music system's full potential.</p>
	NuForce UDH-100 ●● 	<p>For users that need only a single USB input, the NuForce UDH-100 is a USB-only digital-to-analog converter and headphone amplifier that offers unsurpassed performance and value.</p>
Headphone Amp	NuForce HAP-100 ●● 	<p>First developed for the P-20, the HAP-100 takes advantage of our most recent generation of digitally controlled volume controls. At its core is a switched-resistor ladder network constructed using premium, low-noise, thin-film resistors. Only a single resistor is ever inserted in the signal path for any given volume setting. This network permits high-resolution volume adjustment in discrete, 1 dB increments over a range of 100-steps. That single feature alone ensures both extremely precise adjustment and low distortion/low noise performance</p>
Integrated Amp	NuForce DDA-100 ●● 	<p>NuForce DDA-100 is an all-in-one digital amplifier solution for home audio and streaming devices. It delivers high-end audiophile sound quality at an entry level price.</p>
Speaker	NuForce S3-BT Speaker 	<p>The NuForce S3-BT is an active loudspeaker featuring high-fidelity (apt-X and AAC) Bluetooth wireless connectivity. It's designed to fit your modern lifestyle and decor while also delivering a level of audiophile-quality that many dedicated enthusiasts have longed for—wirelessly</p>
Wireless	NuForce Air DAC iWireless System (iTX+Air DAC) 	<p>The Air DAC iWireless System consists of iTX transmitter and Air DAC receiver set. The iTX is designed to connect to your iPod, iPad and iPhone to send audio wirelessly to Air DAC receivers while delivering true, CD quality performance.</p>
	NuForce Air DAC uWireless System (uTX+Air DAC) 	<p>The Air DAC uWireless System consists of uTX transmitter and Air DAC receiver set. The uTX is designed to connect to computer USB port for USB Audio streaming to Air DAC receivers, while delivering true, CD quality performance.</p>
	NuForce Air DAC Receiver 	<p>The Air DAC receiver is a wireless audio receiver designed to accept audio streamed from iPod, iPad, iPhone and computer through NuForce wireless transmitters.</p>
	NuForce iTX Transmitter 	<p>The iTX transmitter is designed to connect to your iPod, iPad and iPhone to send audio wirelessly to NuForce Air DAC receivers. One iTX is capable of pairing with four Air DACs.</p>
	NuForce uTX Transmitter 	<p>The uTX transmitter is designed to connect to computer USB port for USB Audio streaming. One uTX is capable of pairing with four Air DACs.</p>

DAC & Headphone Amp	NuForce Icon HDP 	<p>The Icon HDP is a versatile high performance digital (USB and S/PDIF) to analog converter, headphone amp and preamp for use with computers and entertainment devices.</p>
	NuForce Icon iDo 	<p>The Icon iDo is a "Sound Card" for iPod, iPhone and iPad that extracts audio data in its original digital form (in USB Host mode) for high quality music playback.</p>
	NuForce uDAC-2 	<p>The Icon uDAC-2 is a portable high-performance USB-DAC and headphone amp. For use with laptop or desktop computers, it delivers amazingly high quality audio to your favorite headphones, powered speakers, or even your home stereo system.</p>
	NuForce uDAC-2 Violet 	<p>The Icon uDAC-2 Violet is a stylish and portable high-performance USB DAC and headphone amp. For use with laptop or desktop computers, it delivers amazingly high quality audio to your favorite headphones, powered speakers, or even your home stereo system.</p>
Integrated Amp	NuForce Icon Amp 	<p>The Icon Amp is a small, yet robust stereo amplifier for driving desktop loudspeakers, and is the perfect companion for mating with the Icon HDP.</p>
	NuForce Dia 	<p>The Dia is an integrated power amplifier that accepts digital audio inputs from a variety of consumer entertainment and streaming devices that avoids the complexity of large audio/video receivers.</p>
Speakers	NuForce Cube 	<p>NuForce Cube is designed to be your mobile audio center with high quality headphone amplifier, high performance portable speaker, and computer USB audio digital to analog converter.</p>
Headphones	NuForce HP-800 	<p>HP-800 is a studio-monitor class headphone for the music professional or audio enthusiast who demands accuracy and musicality along with unprecedented value.</p>
Earphones	NuForce NE-770X 	<p>The NE-770X wide-range, non-metallic drivers have been configured to produce a natural, supremely musical sonic signature. Its polycarbonate body is acoustically inert and comfortably lightweight.</p>
	NuForce NE-600X & NE-600M 	<p>The NuForce NE-600X Earphones' unique, high-efficiency design delivers excellent bass, a harmonically correct tonality, a deeply layered soundstage and superb acoustic isolation. (NE-600M with hands-free microphone)</p>

Accessory	NuForce U192S 	The NuForce U192S is a digital signal converter designed for transforming computer USB audio into a coaxial or optical S/PDIF type commonly encountered in high performance consumer electronics devices.
	Cube Audio Connector 	Connector for Cube with iPod Nano and Shuffle
	NuForce Transient Cable™ (Black color, a High-Performance Personal Audio Cable) 	
Cables	Transient PP-MM-0.2M Black 3.5mm stereo to stereo cable (0.2m)	The Transient PP-MM-0.2M Black is a 3.5mm stereo to stereo cable that has unique configuration of fine strands of high-purity (OFC) copper and minimal dielectric to deal with low-signal / high-noise personal audio sources.
	Transient RR-MM-1M Black 3.5mm RCA to RCA cable (1m)	The Transient RR-MM-1M Black is a 3.5mm RCA to RCA cable that has unique configuration of fine strands of high-purity (OFC) copper and minimal dielectric to deal with low-signal / high-noise personal audio sources.
	Transient RR-MM-2M Black 3.5mm RCA to RCA cable (2m)	The Transient RR-MM-2M Black is a 3.5mm RCA to RCA cable that has unique configuration of fine strands of high-purity (OFC) copper and minimal dielectric to deal with low-signal / high-noise personal audio sources.
	Transient PP-MM-1.5M Black 3.5mm stereo to stereo cable (1.5m)	The Transient PP-MM-1.5M Black is a 3.5mm stereo to stereo 1.5m cable that has unique configuration of fine strands of high-purity (OFC) copper and minimal dielectric to deal with low-signal / high-noise personal audio sources.
	Transient PR-MM-1.5M Black 3.5mm stereo to RCA cable (1.5m)	The Transient PR-MM-1.5M Black is a 3.5mm stereo to stereo 1.5m cable that has unique configuration of fine strands of high-purity (OFC) copper and minimal dielectric to deal with low-signal / high-noise personal audio sources.
	Transient PP-MF-2M Black 3.5mm stereo male to female (2m)	The Transient PP-MF-2M Black is a 3.5mm stereo male to female 2m cable that has unique configuration of fine strands of high-purity (OFC) copper and minimal dielectric to deal with low-signal / high-noise personal audio sources.
	NuForce Impulse Cable™ (USB Cable For Digital Audio Application) 	
	Impulse USB-AB-0.5M USB cable (type A to B)(0.5m)	The Impulse USB-AB-0.5M USB cable improves digital audio performance by reducing the jitter and timing errors normally associated with USB audio data transmission.
	Impulse USB-AB-1M USB cable (type A to B)(1m)	The Impulse USB-AB-1M USB cable improves digital audio performance by reducing the jitter and timing errors normally associated with USB audio data transmission.
	Impulse USB-AB-1.8M USB cable (type A to B)(1.8m)	The Impulse USB-AB-1.8M USB cable improves digital audio performance by reducing the jitter and timing errors normally associated with USB audio data transmission.

Oppo BDP-83 SE NuForce Edition

Elegant design. Superior sound.

Our commitment to you.
Our mission statement for life.

NuForce was founded with a singular vision: to provide consumers, audiophiles and audio pros stunning sound with classic and elegant design. Since then NuForce products have earned the loyalty and passion of consumers while getting top marks from the most prominent publications and audio press in the world.

NuForce is more than just products — it's about making highest-quality sound part of an everyday lifestyle. Our growing array of home and portable products bring music and movie sound to life while providing inspiration, transporting you to another place, and making you feel more connected to your recordings and soundtracks, wherever you are.

As music is a universal language everyone can appreciate and enjoy, NuForce products are sold around the world. We remain firmly committed to providing the highest-performance consumer electronics adhering to the most stringent quality standards, and ensuring integrity and value in every product.

Earphones and DACs

Exceptional sound **wherever you are.**

Feel the passion and emotion of your music on the go. Be transported to a plane of higher sound – at the coffeehouse, the park, or your balcony. Close your eyes and let the sound transform your travels or environment with exceptional audio quality. At home or far away, NuForce is with you, and your favorite music and movies sound closer than ever.

Yesterday, if you wanted exceptional sound you'd have to sit in front of an expensive, stationary stereo system. Not so today. Now everyone is on the go with their music. Portable audio players are the new home stereos, and headphones are the new living room speakers.

The DAC (Digital Audio Converter) and headphone output in most digital audio players and laptops are typically not designed to deliver best-quality and fully amplified sound. NuForce provides a huge boost in sound quality of these devices with its portable DACs and headphone amplifiers.

So go ahead and kick back wherever you want. NuForce earphones, DACs and portable speakers are with you.

1 Cube Speaker

Beautifully designed portable speaker with superb sound that can be used standalone or paired with another.

2 uDAC-2

High-performance, 24bit/96kHz USB DAC that connects your personal computer's audio to your home stereo, desktop sound system, or headphones to deliver superior sound.

3 NE-600X

High quality entry-level earphones with excellent bass impact. "The best-sounding value-priced earbud you can buy." 9/10 on Wired.com.

Desktop

Create a sonic sanctuary all day and **into the night.**

Relax after work or before bedtime with your favorite tunes or lifelike movie and TV soundtracks. Enjoy audiophile clarity, depth and detail sound quality at work. Make your favorite mobile device, gaming system, laptop or desktop computer sound sing, with NuForce.

NuForce preamps like the Icon HDP and iDo can make any of your digital audio sources realize their full sonic potential.

State-of-the-art, world-class NuForce technology, design and engineering do more than make your digital devices sound better – they can change your state of mind.

The sound can inspire you, relax you, and transport you to another place. NuForce can make you feel the power and passion of your favorite music and movies like you've never heard them before.

1 Icon HDP

High-performance headphone amp, DAC and preamp all in one neat, affordable little package.

2 Icon iDo

Digital audio converter, or DAC, and headphone amplifier – specifically designed to turn your Apple mobile device and high-end headphones into an audiophile-grade sound system.

Wireless home

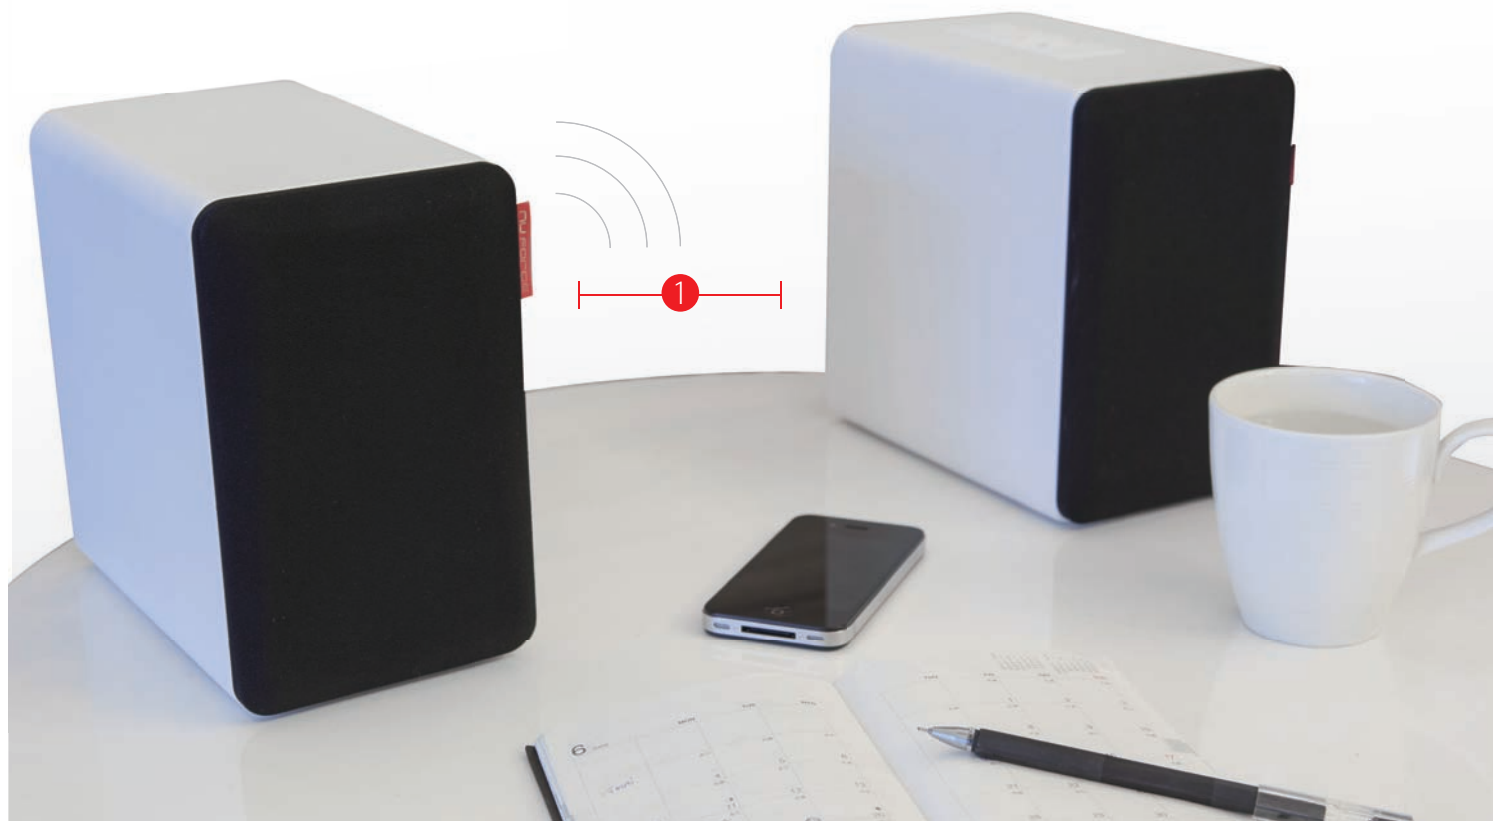

Cut the cord. **Connect to the music.**

Conventional wireless audio may let you play your music from across the room, but only NuForce delivers easy-to-use, audiophile-grade wireless sound.

NuForce gear like our Air DAC Wireless transmitter and audio receiver lets you stream your music from your Apple mobile devices or computer to multiple receivers. So the music moves with you.

Setup doesn't require Wi-Fi routers or IP addresses, making setup hassle-free. It's also free of interference with other Wi-Fi signals. It delivers CD-quality sound with no latency and no interference throughout your environment. Drive a pair of speakers by coupling it with our Icon Amp.

NuForce wireless audio lets you cut the cords. Instead of connecting with cables, connect to the music.

1 S3-BT

Active loudspeaker featuring high-fidelity (apt-X and AAC) Bluetooth wireless connectivity, designed to fit your modern lifestyle and decor while also delivering a level of audiophile-quality wirelessly.

2 Air DAC

Wireless audio receiver designed to accept audio streamed from iPod, iPad, iPhone and computer through NuForce wireless transmitters. Each Air DAC is capable of pairing with 4 transmitters. Offers CD-quality sound, zero latency, a 20-50 meter range, and spread-spectrum technology that "sniffs out" available frequency spectrum to avoid interference.

3 Icon Amp

Audiophile-grade, desktop amplifier designed to drive a pair of speakers. Can also take a pre-amplified analog audio signal from other compatible gear and amplify it to drive your speakers. This makes Icon Amp the perfect complement to other NuForce DACs and headphone amp combos like the uDAC-2, Icon HDP and Icon iDo.

Leisure listening

You can go to a concert or movie, or you
can bring the lifelike sound home.

Today's home stereo and home theater systems can deliver a superb caliber of listening and movie experience that simply wasn't possible just few years ago. NuForce takes the sonic potential and possibilities even further, delivering audio of such exceptional quality to your environment that you'd swear the music and sound effects are real, right in the room with you.

Whether you're playing your music or movies from your computer, CD or DVD player, game system, or media streaming devices, Dia can replace a bulky receiver you might already be using. For an even higher level of leisure listening at home,

you can upgrade to the DAC-100 and STA-100, the top-tier DAC and stereo power amp from our Home Series. By performing high-quality digital-to-analog conversion separately and driving power to your speakers, these components add a new level of realism and detail to pretty much any component you own – without any additional receivers or peripherals.

When you're ready for a rich, realistic listening experience in the comfort of your own home, NuForce delivers.

1

1 DDA-100

The recipient of numerous awards, the all-in-one digital DDA-100 amplifier delivers jitter-free, audiophile-quality sound for home audio and streaming at a remarkably affordable price.

Or you can upgrade to this stylish pair:

2 DAC-100

Lower-priced than our top-tier DAC-9, the DAC-100 is a digital-to-analog stereo converter, pre-amplifier and headphone amplifier in one elegant, superb-sounding unit.

3 STA-100

High-performance stereo amplifier.

2

3

Audiophile listening

Heighten your sonic experience with NuForce High-End.

For those who've experienced it, there is something awesome about listening to high-resolution recordings on a system that includes top-tier components. For those who've experienced music on NuForce gear, it's an experience they'll likely never forget. This is why so many of our customers choose or upgrade to our High-End line of audiophile-quality DACs, preamps and amplifiers.

NuForce components from our Reference Series can create an environment in your home that's a sonic and aesthetic showcase for the highest quality audio experience available. Our clean, elegantly designed components not only deliver exceptional sound, but also look great in your living or listening room.

You'll hear the soundstage of your favorite concert recordings; the clarity and detail of fingers moving over a guitar fret board; the breath and passion of the vocals; the deepest bass and percussion, like you've never heard them before — right there in your listening room.

Whether you're entertaining, with a loved one, or listening yourself for sheer enjoyment, NuForce makes your room a showcase and a sanctuary for beautiful sound and design.

1 DAC-9

Engineered to meet the needs of the most demanding audio purists while also providing the greatest degree of flexibility, the DAC-9 is a true reference-class digital-to-analog stereo converter, pre-amplifier and headphone amplifier — all in one supremely sophisticated package.

3

2 P-20

High-performance preamp. Numerically controlled, single thin-film, ultra-low-noise switched-resistors ladder network volume control. Adjust any input's level and balance for precise source matching. Ultra low-distortion with -0.0004% THD for utterly transparent, detailed sound.

3 Ref-18

Superior resolution, transparency, dynamic finesse, harmonic integrity, and the projection of a precise, well detailed soundstage.
