

## POSITIONING

Delivering 2,000 watts of heart-thumping power, Samson's RSX18A Active Subwoofer is the low frequency solution for event DJs and bands, fixed installations and general live sound reinforcement. With a lightweight, Class D amplifier and rugged plywood cabinet construction, the RSX18A offers quick setup, maximum durability and high definition bass.

## FEATURES

### Performance Versatility

The RSX18A features balanced XLR stereo high pass outputs to run your satellite speakers or daisy chain with additional subwoofers. These outputs allow you to focus the RSX18A's power exclusively on the low frequencies. Balanced XLR stereo full range outputs are also provided.

### Road Rugged

The RSX18A is constructed of solid 9-layer plywood and features a full, perforated steel grill for comprehensive component protection. Steel side carry handles, as well as 3" casters, are provided for quick setup and breakdown.

### The Punch

Featuring a robust 3" voice coil, the RSX18A's 18" low frequency driver brings incredible sonic depth to any sound system. The RSX18A also offers dynamic bass response that remains accurate even at tremendously high SPLs.

## APPLICATIONS

- Event DJs and bands
- Fixed installations
- General live sound reinforcement

## SPECIFICATIONS

Power.....	2000W
THD.....	< 0.1%
