

## MLB DIM-6000 User Manual

Please read over this manual before operation it

### Attention:

Please obey all notices about operation. Safety and repair to avoid getting an electric shock and keep the excellent effect.

Keep clean

Use in door or out door is permitted

The power must same as located

Put in the horizontal direction and don't incline and place upside down.

Power off or pull out plug after use

There are no spare parts with machine. If you need to repair it, please contact distributor or professional repair works.

### Avoiding fire

Only for adults operate. Equip it over the touch of children and pay more attention during operation.

Don't spray it to people directly and far away fire.

The temperature of smoke is very high so that keep the space between machine and other material things more than 100cm.

Pay more attention to all notices sign and operation instructions on all machines.

Before switch on the electricity, you need check the cabinet if there is enough water.

In order to immerge the basketry in the water, the lowest water level must higher than dry ice basketry, taking precautions against damaging facility due to lack of water.

Before heating up, you'd better check the shell for nice grounded.

For protection fan, we suggest operation procedure is as follows:

Before stop using the fan, please hinge the door first, then switch off electricity of it.

Start-up the fan, then unhinge the small door in the fan, releasing wind into the cabinet.

Please releasing spared water after each operation.

Be careful during transit, Taking up lightly and discharging lightly.

Remove package and check:

Open carton to check whether all necessary spare parts include accord the specification list. Please contact distributor if there is anything missed.

Check the appearance of machine and power line to see whether they have some obvious damage. Please contact distributor once you find anything and stop to use this machine.

Basic Parameter:

Heating Power: 6000W

Rated Voltage: AC230V 60Hz

Size: 85×57×81cm

Flake output: 180m<sup>2</sup>

Weight: 40Kgs

Product Characteristics:

Have a good capacity of hot water, the maximum capacity up to 0.13 m<sup>3</sup>. It's suitable for the fast dense fog and long-time continuous spraying requirements.

With quick temperature rising, 3 sets of 2KW electrothermal tube was adopted, 3 sets heating up for about 40 minutes will boil the water.

Using stainless steel shell, it has good intensity. Besides it's enough safe to use because of creepage protection and shell grounded equipped.

With special filler of liquid nitrogen, it's suitable for dry ice and liquid nitrogen fog.

Equipped with stainless steel valve, It's very convenient for water pass in and out. Moreover it's easy to control water level.

Dry ice machine have flexible wheel with self-locked function, after confirming the working site, locked wheel can avoid machine slide. It's portable to push it.

To ensure enough use of dry ice, it has adjustive device of dry ice basketry, adjusting the basketry height in the hot water so as to command the spraying size.

With appropriate handle, it's very convenient for transportation.

Others:

Clean timely to extend the lifespan of machine.

Use dry cloths to clean machine and keep dry while store.
