

1. Take the RockBoard® The Tray and fix your power supply to it. We recommend the use of hook & loop tape or cable ties.

2. Place the lugs of the RockBoard® The Tray into the designated punchings in the support braces of your RockBoard®.

3. Place the RockBoard® The Tray in such a way that the mounting holes of it line up with those of the RockBoard®

4. Take one of the included plastic rivets and separate top and bottom part.

5. Push the bottom part of the rivet into the lined up mounting holes. For optimal fixation the bottom part must be placed flat to the surface of the RockBoard® The Tray.

6. Push in the upper part of the rivet until latches into the bottom part.

Your RockBoard® The Tray is now completely mounted.
