

AH50

Laney
POWER TO THE MUSIC

USER MANUAL

IMPORTANT SAFETY INSTRUCTIONS

WARNING: When using electric products, basic cautions should always be followed, including the following.

1. Read all safety and operating instructions before using this product
2. The product should be powered by a three pin grounded (or earthed) plug connected to a power socket with a grounded earth outlet.
3. All safety and operating instructions should be retained for future reference
4. Obey all cautions in the Operating instructions and on the back of the unit
5. All operating instructions should be followed
6. This product should not be used near water, i.e. a bathtub, sink, swimming pool, wet basement, etc.
7. This product should be located so that its position does not interfere with its proper ventilation. It should not be placed flat against a wall or placed in a built up enclosure that will impede the flow of cooling air.
8. This product should not be placed near a source of heat such as stove, radiator, or another heat producing amplifier.
9. Connect only to a power supply of the type marked on the unit adjacent to the power supply cord.
10. Never break off the ground pin on a power supply cord.
11. Power supply cords should always be handled carefully. Never walk or place equipment on power supply cords. Periodically check cords for cuts or signs of stress, especially at the plug and the point where the cord exits the unit.
12. The power supply cord should be unplugged when the unit is to be unused for long periods of time.
13. If this product is to be mounted in an equipment rack, rear support should be provided.
14. The user should allow easy access to any mains plug, mains coupler and mains switch used in conjunction with this unit thus making it readily operable.
15. Metal parts can be cleaned with a damp cloth. The vinyl covering used on some units can be cleaned with a damp cloth or ammonia based household cleaner if necessary.
Disconnect the unit from the power supply before cleaning.
16. Care should be taken so that objects do not fall and liquids are not spilled into the unit through any ventilation holes or openings. On no account place drinks on the unit.
17. A qualified service technician should check the unit if:
 - The power cord has been damaged
 - Anything has fallen or spilled into the unit
 - The unit does not appear to operate correctly
 - The unit has been dropped or the enclosure damaged.
18. The user should not attempt to service the equipment. All service work is done by a qualified service technician.
19. Exposure to extremely high noise levels may cause a permanent hearing loss. Individuals vary considerably in susceptibility to noise induced hearing loss, but nearly everyone will lose some hearing if exposed to sufficiently intense noise for a sufficient time. The U.S. Government's Occupational Safety and Health Administration (OSHA) has specified the following permissible noise level exposure.

Duration Per Day In Hours	Sound Level dBA, slow response
8	90
6	92
4	95
3	97
2	100
1 1/2	102
1	105
1/2	110
1/4 or less	115

According to OSHA, any exposure in excess of the above permissible limits could result in some hearing loss. Ear plugs or protectors in the ear canals or over the ears must be worn when operating this amplification system in order to prevent a permanent hearing loss if exposure exceeds the limits set forth above. To ensure against potentially dangerous exposure to high sound pressure levels it is recommended that all persons exposed to equipment capable of producing high sound pressure levels such as this amplification system be protected by hearing protectors while this unit is in operation.

SAVE THESE INSTRUCTIONS

 	Intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient to constitute a risk of electrical shock to persons Intended to alert the user of the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product
CAUTION: Risk of electrical shock - DO NOT OPEN	
CAUTION: To reduce the risk of electrical shock, do not remove the cover. No user serviceable parts inside. Refer servicing to qualified service personnel.	
WARNING: To prevent electrical shock or fire hazard, do not expose this appliance to rain or moisture. Before using this appliance please read the operating instructions for further warnings	
 	Este simbolo tiene el proposito de alertar al usuario de la presencia de "(voltaje) peligroso" que no tiene aislamiento dentro de la caja del producto que puede tener una magnitud suficiente como para constituir riesgo de corrientazo Este simbolo tiene el proposito de alertar al usuario de la presencia de instrucciones importantes sobre la operacion y mantenimiento en la literatura que viene con el producto
PRECAUCION: Riesgo de corrientazo - no abra	
PRECAUCION: Para disminuir el riesgo de corrientazo, no abra la cubierta. No hay piezas adentro que el pueda reparar. Deje todo mantenimiento a los tecnicos calificados	
ADVERTENCIA: Para evitar corrientazos o peligro de incendio, no deja expuesto a la lluvia o humedad este aparato. Antes de usar este aparato, lea mas advertencias en la guia de operacion	
 	Ce symbole est utilise pour indiquer a l'utilisateur de ce produit de tension non-isolee dangereuse pouvant etre d'intensite suffisante pour constituer un risque de choc electrique. Ce symbole est utilise pour indiquer a l'utilisateur qu'il ou qu'elle trouvera d'importantes instructions sur l'utilisation et l'entretien (service) de l'appareil dans la litterature accompagnant le produit
ATTENTION: Risques de choc electrique - NE PAS OUVIRIR	
ATTENTION: Afin de reduire le risque de choc electrique, ne pas enlever le couvercle. Il ne se trouve a l'interieur aucune piece pouvant etre reparee par l'utilisateur. Confier l'entretien a un personnel qualifie.	
AVERTISSEMENT: Afin de prevenir les risques de decharge electrique ou de feu, n'exposez pas cet appareil a la pluie ou a l'humidite. Avant d'utiliser cet appareil, lisez les avertissements supplementaires situes dans le guide.	
 	Dieses Symbol soll den Anwender vor unisolierten gefahrlichen Spannungen innerhalb des Gehauses warnen, die von Ausreichender Starke sind, um einen elektrischen Schlag verursachen zu konnen. Dieses Symbol soll den Benutzer auf wichtige Instruktionen in der Bedienungsanleitung aufmerksam machen, die Handhabung und Wartung des Produkts betreffen.
VORSICHT: Risiko - Elektrischer Schlag! Nicht offen!	
VORSICHT: Um das Risiko eines elektrischen Schlages zu vermeiden, nicht die Abdeckung entfernen. Es befinden sich keine Teile darin, die vom Anwender repariert werden Konnten. Reparaturen nur von qualifiziertem Fachpersonal durchfuhren lassen	
ACHTUNG Um einen elektrischen Schlag oder Feuergefahr zu vermeiden, sollte dieses Gerat nicht dem Regen oder Feuchtigkeit ausgesetzt werden. Vor Inbetriebnahme unbedingt die Bedienungsanleitung lesen.	

BEFORE SWITCHING ON

After unpacking your amplifier check that it is factory fitted with a three pin 'grounded' (or earthed) plug. Before plugging into the power supply ensure you are connecting to a grounded earth outlet.

If you should wish to change the factory fitted plug yourself, ensure that the wiring convention applicable to the country where the amplifier is to be used is strictly conformed to. As an example in the United Kingdom the cable colour code for connections are as follows.

EARTH OR GROUND - GREEN/YELLOW
NEUTRAL - BLUE
LIVE - BROWN

NOTE

This manual has been written for easy access of information. The front and rear panels are graphically illustrated, with each control and feature numbered. For a description of the function of each control feature, simply check the number with the explanations adjacent to each panel.

Your Laney amplifier has undergone a thorough two stage, pre-delivery inspection, involving actual play testing.

When you first receive your Laney AudioHub amplifier, follow these simple procedures:

- (i) Ensure that the amplifier is the correct voltage for the country it is to be used in.
- ii) Connect your instrument with a high quality shielded instrument cable. You have probably spent considerable money on your amplifier and guitar - don't use poor quality cable it won't do your gear justice.

Please retain your original carton and packaging so in the unlikely event that some time in the future your amplifier should require servicing you will be able to return it to your dealer securely packed.

Care of your Laney amplifier will prolong it's life.....and yours!

Dear Player,

Thank you very much for purchasing your new Laney product and becoming part of the worldwide Laney family. Each and every Laney unit is designed and built with the utmost attention to care and detail, so I trust yours will give you many years of enjoyment.

Laney products have a heritage which stretches back to 1967 when I first began building valve amplifiers in my parent's garage. Since then we have moved on from strength to strength developing an extensive range of guitar, bass, public address and keyboard amplification products along with a list of Laney endorsees that includes some of the world's most famous and respected musicians. At the same time we believe we have not lost sight of the reason Laney was founded in the first place - a dedication to building great sounding amplification for working musicians.

Warm Regards,

Lyndon Laney CEO

INTRODUCTION

The AH50 is a compact 30W PA Workstation combo in a kickback style cabinet with a reflex loaded 10" loudspeaker. Here at Laney we have dubbed it an AudioHUB. It features two separate channels, a main EQ with familiar bass/mid/treble controls, a built in reverb with level control and footswitch option, a headphone socket for private listening and a DI allowing you to connect to a PA or recording device.

An explanation of these features follows on pages 6-8.

Definitions of Audio: A term used to describe sounds within the range of human hearing (20 Hz to 20 kHz) Also used to describe devices which are designed to operate within this range.

Definition of hub: Hub is a place of convergence where data arrives from one or more directions and is forwarded out in one or more other directions.

FRONT PANEL CONTROLS

- 1 The Mic input is designed for low impedance microphones, it is a stereo jack socket so will work equally well with microphones that are balanced or unbalanced.
- 2 The Line In socket is designed for line level signals such as those obtained from keyboards, sound modules and sounds cards. Both mic and line sockets may be used at the same time.
- 3 This gain control allows you to adjust the audio level of instruments connected to the Channel 1 Mic and Line In sockets.
- 4 RCA Phono socket for the connection of line level equipment like CD Players etc.
- 5 1/4" Jack socket designed to accept any line level signals from equipment such as keyboards, sound modules, CD/MP3 players and sounds cards. Both CD and line in sockets may be used at the same time.
- 6 This gain control allow you to adjust the level of instruments connected to the Channel 2 CD In and Line In sockets.
- 7 Low/Bass frequencies can be boosted or cut by this control such as bass guitar, kick drums, deep vocals and keys below middle C on a keyboard.
- 8 High/Treble frequencies can be boosted or cut by this control. Sources that fall in this range are cymbals, soprano vocals and keys above top C on a keyboard.
- 9 The AH50 has a built in spring line reverb, the level of reverb effect is determined by this control. (Affects both channels)

- 10 Control the overall sound level from the amplifier.
- 11 By connecting a Laney FSI footswitch here you can remotely switch the reverb on / off. This is a useful facility as it allows you to switch the reverb off between songs during a gig.
- 12 This socket provides a balanced low-impedance output-signal from the pre-amplifier taken before the Master Volume but after any tone correction, used for direct-injection of the amplifier signal to a mixing-desk or additional power-amplifier.
- 13 This is for the connection of headphones for private listening, connecting headphones here disconnects the internal loudspeaker.
- 14 Indicates power is connected and the amplifier is switched on.
(Always switch off and disconnect power cord when not in use)
- 15 Main power on/off switch.

- 16 Power inlet socket. Connect to your power source. Make sure the specified voltage is correct for your country!
- 17 This drawer contains the main safety fuse for the unit.
USE ONLY THE CORRECT SIZE AND RATING OF FUSE AS SPECIFIED ON THE PANEL.
The mains fuse ratings are detailed in the specs section at the rear of this manual.
- 18 Serial Number and model of your unit.

General Notes

Amplifier connection: In order to avoid damage, it is advisable to establish and follow a pattern for turning on and off your equipment. With all system parts connected, turn on source equipment, tape decks, cd players, mixers, effects processors etc. **BEFORE** turning on your AUDIOHUB. Many products have large transient surges at turn on and off which can cause damage to your speakers. By turning on your AUDIOHUB **LAST** and making sure its Volume control is set to minimum any transients from other equipment will not reach your loudspeakers. Wait until all system parts have stabilised; usually a couple of seconds. Similarly when turning off your system always turn down the Volume control on your AUDIOHUB and then turn off its power before turning off other equipment.

Caution: These professional loudspeaker systems are capable of generating very high sound pressure levels. Use care with placement and operation to avoid exposure to excessive levels that can cause permanent hearing damage. (Refer to guidelines on page 2)

Servicing: The user should not attempt to service these products. Refer all servicing to qualified service personnel.

BLOCK DIAGRAM

OTHER FEATURES

Your AH50 features a kick style design to enable you to use it as a stage monitor, or a conventional straight combo.

SAMPLE SYSTEM

SPECIFICATIONS

Supply Voltage	~100V, ~120V, @220V, ~230V, ~240V 50/60Hz Factory Option	
Mains Fuse	~220V>~240V = T250mA L. ~100~120V = T500mA L (Time delay)	
Power Consumption	60W	
Output Power	30W	
THD%N	<0.03%	
Inputs (Channel 1)	Microphone	2K input impedance, -20dBu Nominal input level
	Line In	10K input impedance, -10dBu Nominal input level
Inputs (Channel 2)	CD In	22K input impedance, -10dBu Nominal input level
	Line In	10K input impedance, -10dBu Nominal input level
EQ System	Bass	(±15dBu at 60 Hz)(Shelving)
	Treble	(±15dBu at 10 KHz)(Shelving)
Reverb	Yes	(Springline, Remotely switchable)
Internal loudspeaker	10 inch	
DI / Main out	Yes	(-10dBu Nominal Level Balanced)
Headphone Socket	Yes	
Size	440*395*370	(H*W*D)
Unit weight	11.6Kg	
Packing weight	13Kg	

This product conforms to:
European EMC directive(89/69/EEC), Low Voltage Directive (72/23/EEC) and CE mark Directive (93/68/EEC)
