1. QUICK START GUIDE

1. Cut hole using provided template.
2. Attach rails to C ring.
3. Install assembled unit on grid.
4. Drop can in through C Ring.
5. Perform wiring and affix conduit if necessary.
6. Finish with PI speaker from below by turning screws to extend clamps.

2. INTRODUCTION

Thank you for purchasing this Tannoy Ceiling Monitor System product. This product range is suited for high-level music and speech reinforcement applications requiring exceptional sonic quality with uncompromised reliability.

3. UNPACKING

Every Tannoy product and accessory is carefully inspected before packing. After unpacking, please inspect your product to make sure no damage has occurred in transit. In the unlikely event of any damage, would you please notify your dealer immediately and retain your shipping carton, as your dealer may ask you to return the faulty unit to him for inspection.

Each CMS loudspeaker is packed in pairs and provided with the following accessories as standard; C Ring, tile-bridge kit, grille, cut-out template, and paint mask. A plaster (mud) ring is also available as an optional extra.

4. SAFETY NOTICES

Some regional construction codes require the use of a secondary method of securing loudspeakers in ceiling to provide security of a back up support. A secondary support line should be attached from the safety loop on the rear of the product to a source point on the ceiling. Please consult the relevant construction codes in your region.

When using a power driver to install the product it is essential to use the correct torque level settings to avoid over tightening and damage to the ceiling material or clamps.

Recommended torque setting: 1.5Nm

Tannoy will not be held responsible for any damages caused by the improper installation of these loudspeakers.

ELECTRICAL SAFETY NOTICE:

To comply with the standard UL1480, metal - clad flexible conduit (BX) is required for connection to the terminal block for proper earth grounding.

In order to comply with UL regulations, the PI back-can must always be used with the CMS PI models.

SAFETY NOTE:

In order to comply with relevant fire safety regulations (i.e. BS 5839:1998), it is required that in the event of fire, that failure of the circuit to which the loudspeaker is connected does not occur before evacuation of the building is complete. Suitable measures include: -

- a) use of terminal blocks (for connection to primary) with a melting point of not less than 650°C, for example constructed from ceramic materials;
- c) use of terminal blocks of a lower melting point but protected with thermal insulation;
- d) use of terminal blocks such that, on melting, an open-circuit or a short-circuit does not occur.

5. PRODUCT FEATURE IDENTIFICATION:

Fig 1.1: The blind-mount (BM) models come with a pre-fitted back can

Fig 1.2: A pre-install (PI) model shown without pre-install back can

Fig 1.3: Pre-install (PI) back can for PI models

Note that the CMS801 PI model's transformer is pre-attached to the CMS801 PI back can for easy install.

6. ACCESSORIES:

Each product is supplied with the following accessories as standard:

Optional accessories:

7.1 MECHANICAL INSTALLATION GUIDE FOR SUSPENDED CEILINGS

- 1 Remove the ceiling tile from its frame and place it on a flat surface. Mark the cut-out area on the ceiling tile by tracing around the template provided.

- 2 Cut out the hole in the ceiling tile using a circular saw or pad saw.

- 3 Place the C-ring and tile-bridge on top of the ceiling panel, aligning the C-ring over the hole, and screw the C-ring to the tile bridge using the fixings provided.

- 4 Slide the speaker assembly through the hole and turn the screws on the front of the speaker to extend the mounting wings. Tighten the screws until a firm grip is achieved.

If using a power driver, Tannoy recommends a torque setting of 1.5Nm.

DO NOT OVERTIGHTEN!

- 5 Slide the tile panel back into the suspended ceiling. The tile bridge ends will catch over the railings, supporting the weight of the speaker.

Go to section 6 for instructions on wiring and set-up instructions.

7.2 MECHANICAL INSTALLATION GUIDE FOR SHEET-ROCK (PLASTER BOARD) CEILINGS

- 1 Mark the cut-out area on the ceiling by tracing around the template provided.

- 2 Cut out the hole in the ceiling using a circular saw or pad saw, then slide the C-ring into the ceiling, aligning it over the cut-out hole).

- 3 Go to section 6 for wiring and set-up instructions then return to point 4 below.

- 4 Slide the speaker assembly through the hole and turn the screws to extend the mounting wings. Tighten the screws until a firm grip is achieved.

If using a power driver, Tannoy recommends a torque setting of 1.5Nm.

DO NOT OVERTIGHTEN!

- 5 Insert grille by pushing it onto the speaker.

7.3 MECHANICAL INSTALLATION INSTRUCTIONS FOR OPTIONAL PLASTER RING:

An optional plaster (mud) ring bracket is available from Tannoy. This bracket is designed to be pre-installed into newly constructed, non-suspended ceilings.

- 1 Nail or screw the plaster ring to the joists.

- 2 Lay the speaker wiring to where the speaker will be fitted and complete the plastering work on the ceiling.

- 3 Cut out the hole in the ceiling using a circular saw or pad saw.

- 4 Go to section 6 for instructions on wiring then return to point 5 below.

- 5 Slide the speaker assembly through the hole and turn the screws to extend the mounting wings. Tighten the screws until a firm grip is achieved.

If using a power driver, Tannoy recommends a torque setting of 1.5Nm.

DO NOT OVERTIGHTEN!

- 6 Insert grille by pushing it onto the speaker.

7.4 INSTRUCTIONS FOR PRE-INSTALLATION BACK CAN (PI MODELS ONLY):

AN OPTIONAL PRE-INSTALL BACK-CAN IS AVAILABLE FOR ALL PI (PRE-INSTALL) MODELS. THIS BACK-CAN IS DESIGNED FOR EITHER PRE-INSTALLATION INTO NEWLY CONSTRUCTED, NON-SUSPENDED CEILINGS, OR INSTALLATION INTO SUSPENDED CEILINGS WHEN ATTACHED TO THE C-RING AND TILE BRIDGE SUPPLIED.

Note that the CMS801 PI model's transformer is pre-attached to CMS801 PI back can for easy install.

- 1 Attach the back can to the installed conduit. This can be attached in two ways:

a. You can use the clamp at the back of the pre-install back can. The product will accept a squeeze connector with a thread size of up to 22mm. To remove the cable clamp, simply unscrew the threaded washer (under the wiring cover) which holds the cable clamp in place and replace it with a conduit squeeze connector.

Conduit
Conduit Squeeze
Connector

b. You can use any of the three knock-out points at the sides of the PI back can (19mm, 22mm or 28mm diameter):

- 2 Lay the speaker wiring to where the speaker will be fitted and complete the plastering work on the ceiling.

- 3 Cut out the hole in the ceiling using a circular saw or pad saw

- 4 Go to section 6 for instructions on wiring and setting up then return to point 5 below.

- 5 Slide the speaker assembly through the hole and turn the screws to extend the mounting wings. Tighten the screws until a firm grip is achieved.

If using a power driver, Tannoy recommends a torque setting of 1.5Nm.

DO NOT OVERTIGHTEN!

8. WIRING AND SETTING UP:

- 1 Open the wiring cover at the back of the speaker can to access the Euro type connector plug and socket.

- 2 For connection to an amplifier, use pins 1 and 2:

- Pin 1 is positive
- Pin 2 is negative

For connection to additional speakers in a distributed line, pins 3 and 4 are in parallel where:

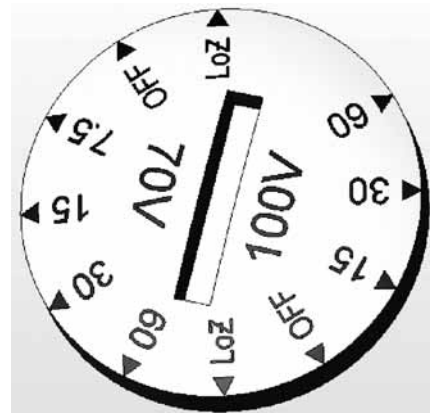

- Pin 3 is negative
- Pin 4 is positive

- 3 Close the wiring cover and tighten both screws on the cable clamp. Use the rotary switch located on the front of the unit to select whether you wish to use the speaker in a low-impedance or distributed-line application.

THE SPEAKER IS SUPPLIED IN LOW IMPEDANCE MODE. NEVER CONNECT THE SPEAKER TO A 70/100 VOLT AMPLIFIER WHILE IT IS SET FOR LOW IMPEDANCE.

All CMS801 models use a 60W transformer. When using distributed-line systems, the transformer can be tapped at 60W, 30W and 15W, with an additional 7.5W tapping for 70.7V line systems.

Ordering information

PART NUMBER	MODEL NAME	BAFFLE / GRILLE COLOUR	PACKED QUANTITY	PACKED WEIGHT kg (lbs)
8001 4730	CMS801 SUB BM	WHITE	2	19.0 (41.89)
8001 4740	CMS801 SUB PI	WHITE	2	11.5 (23.35)

11. PAINTING

If desired, the grille and baffle panel may be painted to match the surrounding décor.

Painting the baffle:

- ☉ Carefully mask off the driver assembly using the paint-mask provided to ensure that the paint does not come into contact with the cone and roll surround.
- ☉ Apply several thin coats of paint – this will provide a better finish than one overly thick coat.

Painting the grille:

- ☉ Carefully remove the acoustically transparent foam from the reverse side of the grille.
- ☉ Paint the grille and then replace the foam - several thin coats of paint will provide a better finish than one overly thick coat.
- ☉ Re-bond the foam to the grille over the entire area using a light spray-adhesive to avoid audible resonances.

12. WARRANTY

No maintenance of the CMS loudspeaker is necessary.

All Tannoy professional loudspeaker products are covered by a 5 year warranty from the date of manufacture subject to the absence of misuse, overload or accidental damage. Claims will not be considered if the serial number has been altered or removed. Work under warranty should only be carried out by a Tannoy Professional dealer or service agent. This warranty in no way affects your statutory rights. For further information please contact your dealer or distributor in your country. If you cannot locate your distributor please contact Customer Services, Tannoy Ltd at the address given below.

13. DECLARATION OF CONFORMITY:

The following apparatus is manufactured in China for Tannoy Ltd of Rosehall Industrial Estate, Coatbridge, Scotland, ML5 4TF and conform(s) to the protection requirements of the European Electromagnetic Compatibility Standards and Directives relevant to Domestic Electrical Equipment. The apparatus is designed and constructed such that electromagnetic disturbances generated do not exceed levels allowing radio and telecommunications equipment and other apparatus to operate as intended, and, the apparatus has an adequate level of intrinsic immunity to electromagnetic disturbance to enable operation as specified and intended.

Details of the Apparatus: Tannoy Contractor Loudspeaker

Model Numbers: CMS801 DC BM
CMS801 DC PI
CMS801 sub BM
CMS801 sub PI
CMS801 PI back-can

Applicable Standards: EN 50103-1 Emission
EN 50103-1 Immunity

Electrical Safety: EN 60065
